Solarflare SFN8522 network adapter
Quick Start Guide

XtremeScale™ Dual-Port 10GbE SFP+ PCIe 3.1 Server I/O Adapter
Part numbers: SFN8522, SFN8522-Onload and SFN8522-Plus

Information in this document is subject to change without notice.

The information disclosed to you hereunder (the “Materials”) is provided solely for the selection and use of Xilinx products. To the maximum extent permitted by applicable law: (1) Materials are made available "AS IS" and with all faults, Xilinx hereby DISCLAIMS ALL WARRANTIES AND CONDITIONS, EXPRESS, IMPLIED, OR STATUTORY, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY, NON-INFRINGEMENT, OR FITNESS FOR ANY PARTICULAR PURPOSE; and (2) Xilinx shall not be liable (whether in contract or tort, including negligence, or under any other theory of liability) for any loss or damage of any kind or nature related to, arising under, or in connection with, the Materials (including your use of the Materials), including for any direct, indirect, special, incidental, or consequential loss or damage (including loss of data, profits, goodwill, or any type of loss or damage suffered as a result of any action brought by a third party) even if such damage or loss was reasonably foreseeable or Xilinx had been advised of the possibility of the same. Xilinx assumes no obligation to correct any errors contained in the Materials or to notify you of updates to the Materials or to product specifications. You may not reproduce, modify, distribute, or publicly display the Materials without prior written consent. Certain products are subject to the terms and conditions of Xilinx’s limited warranty, please refer to Xilinx’s Terms of Sale which can be viewed at https://www.xilinx.com/legal.htm#tos; IP cores may be subject to warranty and support terms contained in a license issued to you by Xilinx. Xilinx products are not designed or intended to be fail-safe or for use in any application requiring fail-safe performance; you assume sole risk and liability for use of Xilinx products in such critical applications, please refer to Xilinx’s Terms of Sale which can be viewed at https://www.xilinx.com/legal.htm#tos.

AUTOMOTIVE APPLICATIONS DISCLAIMER

AUTOMOTIVE PRODUCTS (IDENTIFIED AS “XA” IN THE PART NUMBER) ARE NOT WARRANTED FOR USE IN THE DEPLOYMENT OF AIRBAGS OR FOR USE IN APPLICATIONS THAT AFFECT CONTROL OF A VEHICLE (“SAFETY APPLICATION”)

UNLESS THERE IS A SAFETY CONCEPT OR REDUNDANCY FEATURE CONSISTENT WITH THE ISO 26262 AUTOMOTIVE SAFETY STANDARD (“SAFETY DESIGN”). CUSTOMER SHALL, PRIOR TO USING OR DISTRIBUTING ANY SYSTEMS THAT INCORPORATE PRODUCTS, THOROUGHLY TEST SUCH SYSTEMS FOR SAFETY PURPOSES. USE OF PRODUCTS IN A SAFETY APPLICATION WITHOUT A SAFETY DESIGN IS FULLY AT THE RISK OF CUSTOMER, SUBJECT ONLY TO APPLICABLE LAWS AND REGULATIONS GOVERNING LIMITATIONS ON PRODUCT LIABILITY.

Issue 3
1.1 Overview

The Solarflare XtremeScale™ SFN8522 is a dual-port SFP+ server I/O adapter combining precision time synchronization, hardware timestamping with ultra-low latency 10G/1G Ethernet. XtremeScale™ adapters with AppFlex™ technology provide a flexible platform to deliver specific on-board services with a single server adapter.

User Guide

For comprehensive installation instructions, configuration and tuning guidance, and AppFlex information please consult the Solarflare Server Adapter User Guide.

The Solarflare User Guide can be downloaded from https://support.solarflare.com

Drivers

Solarflare server adapters support the following OS distributions; Linux RHEL6, 7 and MRG, SLES11, 12 and SLERT, Ubuntu 14.04, 14.10 and 15.04, Debian 7.0 and 8.0, Linux KVM, VMware ESXi 5.5 and 6.x, Windows Server 2008 R2 and later versions.

Drivers can be downloaded from https://support.solarflare.com

Onload

Solarflare server adapters also support Onload – a ‘kernel bypass’ accelerated user-level TCP/IP network stack, providing extremely low latency. Onload links with the application using the standard POSIX BSD sockets API, meaning no modifications are required to the application being accelerated. Onload is enabled via AppFlex technology activation.

To learn more about Onload please visit http://www.openonload.org

Precision Time Protocol

XtremeScale™ adapters are equipped with a Stratum 3 oscillator to support hardware timestamping of PTP packets and server synchronization. Solarflare’s Enhanced PTP is enabled via AppFlex technology activation, and can synchronize multiple adapters to a PTP source.

Solarflare’s Enhanced PTP daemon is available from https://support.solarflare.com
Solarflare adapters covered by this guide

Adapters covered by this guide include different pre-installed activation keys:

<table>
<thead>
<tr>
<th>Part number</th>
<th>Activation keys included</th>
<th>Regulatory product code</th>
</tr>
</thead>
<tbody>
<tr>
<td>SFN8522</td>
<td>—</td>
<td>SR203</td>
</tr>
<tr>
<td>SFN8522-Onload</td>
<td>UltraLowLatency, Onload, TCPDirect</td>
<td>SR203</td>
</tr>
<tr>
<td>SFN8522-Plus</td>
<td>UltraLowLatency, Onload, TCPDirect, PTP</td>
<td>SR203</td>
</tr>
</tbody>
</table>

Solarflare AppFlex technology activation enables specific adapter features. Additional activation keys can be installed on existing adapters to enhance their capabilities.

This enables creating a server platform that is optimized for a range of application environments including cloud, web server deployment, virtualization, network acceleration, hardware precision timestamping, line-rate packet capture, and server level protection against DOS/DDOS threats.

To learn more about AppFlex technology activation, visit http://www.solarflare.com/my-appflex

Support

If you have any questions on your Solarflare products please contact your sales representative or contact Solarflare.

For support on Solarflare products please email support@solarflare.com

Limited warranty

Before using any of the Products, Purchaser shall determine the suitability of the Products for Purchaser’s intended use by considering such factors as overall product design and the processing and environmental conditions to which the Products will be subjected. Solarflare warrants solely to Purchaser, for a period of 3 years from the date a Product is delivered to Purchaser (the “Warranty Period”), that the Product will conform in all material respects to Solarflare’s published specifications for such Product in effect as of the date of purchase (the “Limited Warranty”).

To view the whole warranty, visit http://www.solarflare.com/Media/Default/PDFs/Support/Solarflare_3yrWarranty_ServerAdapters.pdf
1.2 Installing the adapter

Solarflare SFN8522 server adapters are compatible with Intel and AMD x86 PCs with 8-lane or 16-lane PCIe 3.1 (8GT/s), PCIe 3.0 (8GT/s), PCIe 2.0 (5GT/s) or PCIe 1.x (2.5GT/s) slots.

**CAUTION:** Servers contain high voltage electrical components. Before removing the server cover, disconnect the mains power supply to avoid the risk of electrocution. Before handling computer components, discharge static electricity from yourself by touching a metal surface, or wear a correctly fitted anti-static wrist band.

Fitting the bracket

Solarflare SFN8522 adapters are fitted with a full-height bracket. A low-profile bracket is also supplied for PCI Express slots that require this type of bracket.

An optional 1PPS bracket and cable assembly, Solarflare part number SOLR-PPS-DP10G, is available for Solarflare dual-port SFP+ server adapters. For detailed fitting instructions, refer to the *Solarflare Server Adapter User Guide*. 
Inserting the adapter in a PCI Express slot

The SFN8522 SFP+ dual-port adapter is a half-height, half-length, 8-lane PCIe 3.1 form factor adapter.

**NOTE:** The Solarflare SFN8522 server adapter requires an 8-lane or 16-lane PCI Express slot. For maximum performance the adapter should be installed in a PCIe 3.1 or PCIe 3.0 slot, but is compatible with PCIe 2.0 or PCIe 1.x.

Shut down the server and unplug it from its power source. Remove the server cover to access the PCI Express slots in the server. Locate an 8-lane or 16-lane PCI Express slot (refer to the server manual if necessary) and insert the Solarflare server adapter. Secure the adapter bracket in the slot.

**CAUTION:** The SFN8522 adapter must have sufficient air flow cooling – during normal operation the minimum air flow required is 200 LFM. **Server cooling fans must be fully operative to prevent damage to the adapter.**

Cables and transceivers

Solarflare SFP+ server adapters support a wide range of SFP+ direct attach cables, 10G BASE-SR optical transceiver modules, 1Gb optical transceivers and 1000BASE-T transceivers.

For a full list of supported cables and transceivers visit [http://www.solarflare.com/Transceivers-and-Cables](http://www.solarflare.com/Transceivers-and-Cables)
1.3 PXE booting

All Solarflare adapters comply with PXE 2.1, and support PXE booting.

This adapter is shipped with PXE booting enabled, and boot ROM support ‘exposed’. The Boot ROM Agent runs during the machine bootup stage, allowing the user to enter the setup screens (via Ctrl+B) and enable or disable PXE support as required. The Boot ROM Agent can also be invoked using the Solarflare supplied `sfboot` utility. For detailed instructions, refer to the Solarflare Server Adapter User Guide.
1.4 Warnings

Changes or modifications not expressly approved by Solarflare Communications Inc., the party responsible for FCC compliance, could void the user’s authority to operate the equipment.

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Underwriters Laboratory Inc (‘UL’) has not tested the performance or reliability of the security or signaling aspects of this product. UL has only tested for fire, shock or casualty hazards as outlined in the UL’s Standard for Safety UL 60950-1. **UL Certification does not cover the performance or reliability of the security or signaling aspects of this product. UL makes no representations, warranties or certifications whatsoever regarding the performance or reliability of any security or signaling related functions of this product.**

The laser safety of this product has been verified using the following certified laser device module (LDM). Refer to the manufacturer documentation for test certification details:

<table>
<thead>
<tr>
<th>Manufacturer</th>
<th>Model</th>
</tr>
</thead>
<tbody>
<tr>
<td>Finisar Corporation</td>
<td>FTLX8574D3BCL-SL</td>
</tr>
<tr>
<td>Lumentum Operations</td>
<td>PLRXPL-SC-S43-SF</td>
</tr>
</tbody>
</table>

When installed in a 10Gb Ethernet network interface card from the Solarflare SFN8000 series, the laser emission levels remain under Class I limits as specified in the FDA regulations for lasers, 21 CFR Part 1040.

The decision on what LDMs to use is made by the installer. For example, equipment may use one of a multiple of different LDMs depending on path length of the laser communication signal. This equipment is not basic consumer ITE.

This equipment is installed and maintained by qualified staff from the end user communications company or subcontractor of the end user organization. The end product user and/or installer are solely responsible for ensuring that the correct devices are utilized in the equipment and the equipment with LDMs installed complies with applicable laser safety requirements.

Do not install this product in hazardous areas where highly combustible or explosive products are stored or used without taking additional safety precautions. Do not expose this product to rain or moisture. This Class III SELV product is intended only to be powered by a certified limited power source.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that
interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

この装置は、クラスB情報技術装置です。この装置は、家庭環境で使用する目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。取扱説明書に従って正しい取り扱いをして下さい。VCCI-B

警告使用:

这是一个B类产品，在居住环境中使用时可能会导致无线电干扰，在这种情况下，用户可能需要采取适当的措施。

B 급 기기(가정용 방송통신기기): 이 기기는 가정용(급급)으로 전자파적합등록을 한 기기로서 주로 가정에서 사용하는 것을 목적으로 하며, 모든 지역에서 사용할 수 있습니다.
